

HUMAN RIGHTS: USING OUR BUYING POWER TO RESPECT HUMAN RIGHTS

Achieving supply chain transparency

We will make our high-priority supply chains transparent, so that we have a better understanding about the **origin of the products** we sell.

Partnering for change

We will partner and collaborate to **improve the livelihoods and working conditions** for producers along our high-priority supply chains.

Increasing public awareness for human rights

We will increase **public awareness for the importance of human rights** by being transparent about challenges and using our voice to advocate for change.

Upholding human rights for workers

We will work to ensure that the **human rights of workers** that contribute to our priority supply chains, e.g. cocoa, fish and seafood, and textiles, are respected and we will work towards improving their human rights if any issues are found.

Integrating corporate responsibility into buying

We will use our buying power to **respect and support human rights** by making our buying practices more sustainable.

Sustainable buying practices are essential for the long-term success of our business.
