

# RESOURCE EFFICIENCY: USING RESOURCES WISELY AND PROTECTING ECOSYSTEMS

## Sourcing sustainably

We will act to protect ecosystems by **focusing on sustainable sourcing, good water stewardship and deforestation-free supply chains** across our priorities, e.g. cocoa, fish and seafood, and textiles.

## Reducing food and operational waste

We will **reduce food waste across our business** and make other operational waste reusable or recyclable.

## Tackling packaging

We will reduce our own-brand product packaging weight and make the packaging we use **100% reusable, recyclable or compostable.**

## Designing and producing products responsibly

We will work with our business partners to ensure **our products are designed and produced in an environmentally responsible way.**
