

## Reducing greenhouse gas emissions in our operations

**ZERO CARBON:  
DOING OUR PART TO LIMIT  
GLOBAL WARMING**

We will **reduce the operational greenhouse gas emissions of our sites by 26% by 2025** compared to 2016 levels. This will bring us closer to our vision of zero carbon.

*Our business activities have a significant impact on climate and the environment. Our goal is to minimise the ecological footprint of our corporate activities.*

## Reducing greenhouse gas emissions in our supply chain

We will **encourage our strategic suppliers**, who are responsible for 75% of product related emissions, to set their **own science-based emissions targets** by 2024.
